Our Strengths

- High expertise in the field of information security and project management
- We are experienced, competent and innovators.
- We make our expertise available to the long term and give it to the customers.
- We accompany our clients to achieve their project objectives.
- We are independent of manufacturers and products and advice therefore objective and neutral.

Special Information Security know-how, experience from practice and the **neutral view** of an organization are our undisputed advantage as **external Coach & Consultants**. We advice and support you from the idea and implementation until to the solution.

Practical – concretely - appropriately, to the point!

Information Security

In the last few years, information security has become a key concern of all companies and organizations. The confidentiality, integrity and availability of data has to be completely ensured at all times.

Information security is therefore for all small and medium-sized enterprises (SMEs) an important topic. We are happy to show you our approach to achieve an adequate basic IT protection without high costs. With this approach, an SME will be able to

take necessary measures to improve information security.

We offer you comprehensive support in all areas of information security – from consulting to integration.

Security Health-Check

The independent examination of your IT-Infrastructure and the reliable conversion of recommended measures ensure the confidentiality, integrity and availability of your data, so that you can concentrate on your primary creation of value processes.

Security Audit

In our security analysis, our experienced and certified ISO 27001 Lead Auditors will review your concepts, processes, infrastructure and organizational structures according to the established international ISO 27001 security standard.
