

# SASERASAFE for Collaboration

SaseraSafe makes business collaboration secure and simple

## SaseraSafe

**SaseraSafe makes business collaboration secure and simple. Store, share and synchronize your files with our flexible Team Spaces to keep your team, suppliers or customers up to date, anywhere, anytime.**

Confidentiality suffers in this age of digitisation. We all know that national intelligence agencies systematically, and in some cases completely, intercept not only the governmental and military but also the civil exchange of information in their battle against criminality and terrorism. The American NSA is particularly active here in the name of "national security", as has been known since the disclosures of the former NSA employee Edward Snowden. However, big Internet companies such as Google and co. also play a special role and the world of business is also being increasingly affected by these developments. Industrial espionage (business intelligence) is eminently more important in this context than in the analogue age. In a sensational decision in October 2015, the European Court of Justice rated American companies as unreliable for the storage and

processing of personal data on account of US security laws. This rendered the so-called "Safe Harbour" ruling of the European Commission as void, and ICT legal experts also believe that alternative constructs could also be invalid.

With SaseraSafe you get highly secure online storage for companies and individuals. Our award-winning solution simplifies file sharing in teams and offers practical cloud storage with an integrated password manager.

Maximum Privacy for your Team - Strong encryption and authentication ensure that only team members can view the files stored in your shared workspace. This makes SaseraSafe highly suitable for sharing sensitive information such as financial, client and patient data.

## Feature list

The following functionalities are available within SaseraSafe for BitLocker

- **Safe File Synchronisation** - Synchronise shared files with the SaseraSafe Client for PC/Mac so everyone in your team always has the latest version of any file.
- **Safe Web & Mobile Access** - Instantly access your Team Space from any browser, iOS or Android device. Your data remains highly secure even with mobile access.
- **Member Management** - Invite Team Space members safely with a security code and manage their rights through different user roles and rights.
- **SecureViewer** - Read PDFs and open images from any computer without leaving a digital trace.
- **Activity Journal** - Always stay updated on the latest activities in your Team-Space with the activity journal function.
- **Notifications** - Receive email updates about important changes in your Team Spaces (frequency adjustable).
- **2-factor Authentication with SMS**
- **All your business files stored in a single, secure location (Swiss Fort Knox)**
