

SASERADRIVE Secure USB-Drive

**Hardware Encrypted USB
Flash Drive – High Secure**

SaseraDrive

This SuperSpeed USB 3.0 secure flash drive is the ultimate data storage solution for high data security organizations. The SaseraDrive Defender 3000 AES 256-bit hardware encrypted USB 3.0 flash drive boasts FIPS 140-2 Level 3 certification, remote management capabilities and complies with the Trade Agreements Act (TAA Compliance), making it an outstanding USB drive for the highest security environments, including government, healthcare and financial industries management with different roles of administration and multi-client-capability delivers new opportunities for customers and third party service providers.

Well beyond just simple password protection, this SuperSpeed USB 3.0 hardware encrypted drive offers on-board Anti-Virus, brute-force protection, waterproof / tamper-proof casing, and a solid tactile finish that make it an impressive USB device to meet the most rigorous data security needs and requirements. The Defender 3000 is easy to use, works on most OS

platforms, and can be remotely managed along with other secure USB devices anywhere in the world. Furthermore, all SaseraDrive Defender USB drives are fully protected from potential risk of "BadUSB" malware tampering with digitally-signed, RSA-2048 secure firmware.

The SaseraDrive Defender 3000 proves unequivocally that it meets and surpasses the most stringent federal, healthcare and financial industry security regulations in the world.

Feature list

The following functionalities are available within SaseraDrive Secure USB-Drive

- **FIPS 140-2 Certified, Level 3**
- **SuperSpeed USB 3.0 Interface**
- **256-bit AES Hardware Encryption**
- **Remote Management Ready**
- **Simple and Easy to Use**
- **Windows, Mac and Linux Compatible**
- **Real-time Anti-Virus Scanning(1)**
- **Rugged Alloy Housing**
- **Brute-Force Protection**
- **Tamper-Proof Protection**
- **RSA-2048 Digitally-Signed Secure Firmware**
- **Waterproof**
- **TAA Compliant**
- **Complies with Industry Security Standards such as HIPAA, Sarbanes Oxley, GLBA, etc.**
- **Available Capacities: 4GB, 8GB, 16GB, 32GB, 64GB, 128GB**
- **Customized Engraving Available**

Security Architecture

AES 256-bit hardware encrypted USB Flash Drive to protect your data anywhere and anytime from loss or theft.

- AES 256-bit Hardware encryption is the backbone of the SaseraDrive Defender 3000's security, providing top tier performance unmatched by software encryption solutions. In addition, password matching and security functions are contained in the cryptographic chip, meaning that the encryption cannot be compromised, further ensuring your data's security.
- The SaseraDrive Defender 3000 hardware encrypted, secure flash drive is FIPS 140-2 Certified, Level 3.
- Tamper Proof Design. The SaseraDrive Defender 3000's casing is protected with an epoxy compound that is water resistant and prevents physical access to the chip. Any subversive attempt to remove the epoxy compound destroys the flash chip, rendering it unusable and inaccessible.
- SuperSpeed USB 3.0 Interface
- The SaseraDrive Defender 3000 offers USB 3.0 technology for lightning-fast data transfers, while also maintaining compatibility with USB 2.0. Connecting the SaseraDrive Defender 3000 to a USB 3.0 supported USB port provides superior read / write speeds for quick, easy and convenient transfer of data.
